About us

We pave the path for **digital** excellence

Welcome to Tech Soul, where **innovation** meets intelligence. We are a **Dubai**-based technology company, dedicated to transforming businesses with cutting-edge **solutions**. From software development to **AI-driven** insights, **Odoo** ERP integration to **IoT** innovation, we pave the path for digital excellence.

At Tech Soul, we believe in crafting technology **solutions** that resonate with the future. Our journey began with a vision to integrate **intelligence** with everyday business operations.

With expertise spanning **Software** development, **AI**, **IoT**, **Odoo** **ERP**, and comprehensive **Tech consultancy**, we are your partners in digital transformation. Our **solutions** are designed to be high-performing, scalable, and tailored to your unique needs.

Smart Solutions

Software Development & Odoo ERP

At Tech Soul, we build **intelligent** digital ecosystems by combining **cutting-edge** software development with the powerful capabilities of **Odoo ERP**.

Our solutions are tailored to the unique workflows of **startups**, **SMEs**, and **large enterprises**—whether it's building a custom web or mobile app from scratch, streamlining inventory and **finance** operations through Odoo, or integrating **APIs** to unify disparate systems.

We emphasize scalability, user experience, and automation to deliver platforms that don't just work—they **elevate** your business performance. From consultation and design to implementation and post-launch **support**, our agile approach ensures you're equipped with **future-ready** technology that drives **efficiency**, **growth**, and **innovation**.

Artificial Intelligence & IoT

Our AI and IoT services work in synergy to bring intelligence and automation to your business operations.

At Tech Soul, we develop AI solutions that power predictions, automate tasks, and personalize user experiences—while our IoT systems seamlessly connect devices, sensors, and machinery to create real-time, data-driven ecosystems.

Whether you're optimizing supply chains, enhancing customer engagement, or enabling smart environments, we ensure your technology not only reacts—but learns and evolves. Together, AI and IoT enable smarter decisions, increased operational efficiency, and next-generation digital transformation.

Case Studies

Helping **Consolbase** Manage Cargo Better Kenya

Consolbase Ltd., a key player in cargo handling at Mombasa Port, faced significant challenges with a legacy system. These inefficiencies led to delays, and high operational costs, hindering their ability to efficiently manage the vast flow of goods. To overcome this, we developed and implemented a comprehensive **Cargo Freight Station (CFS)** management system. This robust solution integrated core functionalities like **CFS Operations (built from scratch)**, **Finance**, **Sales**, **Purchase**, **Warehousing**, **Inventory**, **HR**, and **Document Management**, providing Consolbase with a single, streamlined platform to control their entire business.

The system has promises to boost data accuracy, enhanced reporting capabilities, and increased overall staff productivity, leading to greater customer satisfaction. This strategic technological upgrade has solidified Consolbase's position as a modern, efficient leader in Mombasa's cargo management sector, ready for future growth and challenges.

Building Path to Peace for **Discover Islam**, Bahrain

Discover Islam embarked on an ambitious global initiative, "Path to Peace," aiming to provide accessible and accurate information about Islam to a **worldwide** audience. Their challenge was to overcome language barriers and geographical distances, offering a personal and engaging way for individuals from **diverse** backgrounds to learn and ask questions. They sought an innovative digital solution that could reach users directly, foster understanding, and scale internationally.

To meet this vision, we are developing a highly **dynamic** and multi-lingual communication platform centered around an advanced **AI Chatbot**. This system allows users globally to interact with the chatbot in their native language, gaining insights into Islam conveniently. The project integrates seamlessly with an **Odoo** website for comprehensive content delivery and utilizes **WhatsApp** as a primary, familiar communication channel for chatbot interactions.

Harmonizing Operations for **Tempo Africa**, Tanzania

Tempo Africa, a fully-fledged and **dynamic** player in the travel industry, faced the common challenge of managing complex, disparate operations across various departments.

To address these needs, we are developing a **comprehensive Enterprise Resource Planning (ERP)** system tailored specifically for Tempo Africa. This integrated platform will centralize critical business functions, including: Sales to manage **bookings** and customer interactions; **CRM** for enhanced customer relationship management; **Purchases** for supplier and **vendor management**; robust **Finance** modules for accounting and **financial** reporting; Digital **Marketing** integration to drive outreach; and a centralized **Document Management** System for all critical records. This ERP system will empower Tempo Africa with improved efficiency, accurate data, enhanced decision-making, and a seamless operational flow, ultimately boosting their service delivery and competitive edge in the travel sector.
